

# SEPTAGE RECEIVING

## RECEIVING TERMINALS

### INTEGRATED

Retrofits to new or existing infrastructure providing all the same features as all of our turn-key solutions.

Our Receiving Terminals will interface with any manufacturer's screening, grinding, and grit separation equipment.

- Our panels can be easily integrated into your headworks.
- If you require a complete package, we work with manufacturers to provide an integrated solution.

## TURN-KEY STATIONS

Each turn-key solution is a self contained, insulated and maintenance friendly.

They can be heated, cooled, or both, and come complete with electric activated plug valve, stainless steel piping, magnetic flow meter, access terminal, and field terminal box.

Our stations can also be used to receive fat, oil, and grease (FOG Receiving).

### Turn-Key Options

- Refrigerated Sampler
- Flush System
- On-line PH Monitor
- Conductivity Probe
- Hose Reel
- Air/Vacuum Relief Valve
- Receipt Printer
- Grinder

### SEWAGE GENERAL™

The Sewage General™ is a cost effective, permanent solution to eliminate the problems associated with uncontrolled septage dumping into a municipal collection system.

### CUSTOM STATION

Custom Stations can be built to suit your specific requirements.

Contact our sales department if you have a complex septage receiving issue you need a solution for.

COST REDUCTION / ACCOUNTABILITY / ENVIRONMENTAL COMPLIANCE / REVENUE GENERATION / SECURITY

# System Administration Software

SEPTAGE+™

The cornerstone of our Septage Receiving Stations is the Windows based **SEPTAGE+™** System Administration Software. It is the tool you need to control, monitor, and analyze your septage receiving and allows you to centrally manage multiple stations.

## WHAT CAN OUR SOFTWARE DO FOR YOU?

### Provide Security by Controlling:

- Hours of operation
- Who is using your facility
- What is being disposed

### Generate Revenue

- Charge for septage received

### Reduce Administration Cost

- Account Manager
- Station Manager
- System Manager
- Communication Connectivity Options (Ethernet, Dial Up, Radio, Cellular)

The image displays several screenshots of the SEPTAGE+ software interface. At the top right is the splash screen for 'Septage+ Version 7.0.0.1' by 'FLOWPOINT', with a copyright notice for 1997-2014. Below this are several windows: a 'Home' dashboard with navigation icons; a 'Customers' list window showing a table of customer data; a 'New Customer' form with fields for customer information and billing details; a 'New Truck' form with fields for truck information; and a detailed view for customer '12354 (Scott Lefebvre Septic Haulers)', which includes contact information, a table of transactions, and a summary of financial data.
