

SOLUTIONS THAT FLOW

FLOWPOINT

A proven leader in custom-engineered,
modular water and wastewater
treatment solutions.

About Us

Since 1996, Flowpoint has partnered with utilities, municipalities, developers, and industrial operators across North America to design and manufacture automated, decentralized, engineered-to-order water and wastewater infrastructure. Their systems are built off-site for faster, more efficient installation.

Why Choose Us

Engineered Solutions

Engineered-to-order. Every system is tailored to site conditions, specifications, and operational goals.

In-House Controls & Software

Integrated delivery. Engineering, fabrication, controls, and cloud-based software are developed in-house.

Responsive Partnership

Long-term support. Flowpoint emphasizes right-fit design, real-time monitoring, and dependable service after installation.

Industries We Serve

- ✓ Municipal
- ✓ Commercial and Residential Development
- ✓ Industrial
- ✓ Utility

Water Treatment

Advanced packaged treatment including biological filtration, membrane purification, and modular systems for well water and groundwater challenges.

Wastewater Treatment

Compact modular wastewater systems for decentralized applications, lagoon retrofits, capacity expansion, and regulatory compliance.

Bulk Water & Septage

Automated bulk water dispensing and septage receiving stations with secure access, load tracking, billing support, and unattended operation.

Pressure & Storage

Custom pressure management stations, booster pump packages, and above-ground water storage solutions designed for specific site and flow requirements.

Controls & Software

CSA/cUL-certified custom control panels plus Fusion cloud software for remote monitoring, analytics, reporting, and administrative control.

Engineering & Design

Collaborative concept development and system configuration for new installations, upgrades, and specialized applications.
