

RECLAIMED WATER STATIONS

TURN KEY STATIONS AND SOFTWARE

MEETING THE FUTURE OF WATER DEMAND

For nearly 30 years, Flowpoint has delivered durable, turnkey bulk water dispensing stations that simplify reclaimed water distribution. Our fully assembled systems install quickly and integrate with Fusion™ software to manage access, limits, and payments—backed by a 5-year warranty.

WHY RECLAIMED WATER?

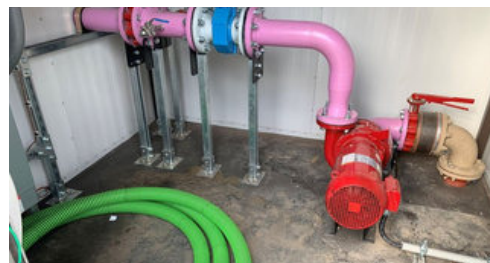

With population growth, climate change, and aging infrastructure putting pressure on potable supplies, reclaimed water is one of the most effective solutions.

- Boosts supply and resilience in drought-prone regions (EPA).
- Saves millions of gallons of potable water annually.
- Meets strict safety standards with advanced treatment.

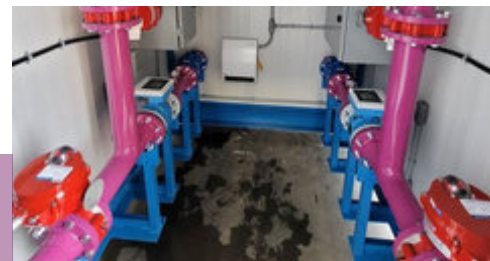

TECHNOLOGY THAT BUILDS TRUST

Flowpoint stations are built for reliability and can be paired with advanced treatment processes to ensure consistent, high-quality reclaimed water delivery. With integrated monitoring and reporting tools, operators stay in full control—while customers get dependable access.

Reclaimed water isn't just a stopgap. It's a safe, sustainable, and scalable solution that helps communities lower costs, conserve resources, and protect public health.

Above: Station with small booster pump to increase pressure at the station and reduce burden on the WWTP.
Below: Custom large simultaneous dual fill station with upper and lower fill points. Stations like this can also be built to manage different reuse types and points.

OUR GUARANTEE

Five-Nines Uptime (99.999%)
5 Years Parts Warranty
Never Exceed Proposal Price

Flexible dispensing options 2" - 6", overhead and lower fill to meet the needs of your haulers

SMARTER DISTRIBUTION WITH FLOWPOINT

Reclaimed water stations serve as secure, automated access points for utilities, municipalities, and contractors. Our systems:

- Track usage in real time for accountability and billing
- Provide 24/7 secure access for authorized users
- Reduce reliance on treated potable sources
- Support regulatory compliance and water quality testing
- Divert the higher costs of potable production

RECLAIMED WATER - BACKED BY EXPERIENCE

At Flowpoint, we believe reclaimed water is the key to smarter, more sustainable water management. Our turnkey dispensing stations give utilities and municipalities the tools to save money, protect potable supplies, and ensure reliable service for years to come. Backed by nearly 30 years of experience and an industry-leading 5-year warranty, Flowpoint provides solutions that are safe, scalable, and built to last.

CUSTOM-BUILT FOR YOUR NEEDS

Can't find exactly what you're looking for? No problem. Every Flowpoint station is built to match your unique requirements, and chances are we've already designed something similar. Ready to take the next step? Contact us today to learn how we can help your community close the loop on water reuse.

COMPLETE ACCOUNTABILITY

HEAR WHAT OUR CUSTOMERS HAVE TO SAY ABOUT US

"Thank you for continuously providing top notch customer service and support. The team at Flowpoint are truly dedicated and professional in all aspects. Our staff and customers are very happy with the Fusion software and it's ease of use. Keep up the great work Flowpoint!"
