

FLOWPOINT

SEPTAGE RECEIVING

SAFEGUARD YOUR WWTP PROCESSES

Above: Automated refrigerated sampler with auto tagging to septage hauler's account and ID

Below: Pretreatment devices integrated into stations allow for easy handling of solids such as rocks, ragging and grease

CAPTURE MISSED REVENUE EFFECTIVELY

Allow for receiving of system septage securely with a Flowpoint Environmental Systems SewageGeneral™ station. Each station is completely customizable to fit your needs and can be remotely monitored and controlled from our cloud based Fusion™ software.

FEATURES

- Single or dual load out points with hose reel for cleaning
- Automated manifests for each hauler
- Remotely create, limit or shut off hauler station access
- Refrigerated auto sampling tagged with hauler ID and time/date
- Inline multi-parameter analyzers record hauler based fill data
- Pretreatment devices including rock traps, FOG capture, ragging and more allow you to efficiently introduce septage into your headworks
- Completely customize your station inside and out with your choice of exterior panels or faux brick options
- Automated billing and statement delivery
- Online access to your customers to download statements, add money to their account and add or remove users

Eliminate the administrative burden of septage receiving with a Flowpoint Environmental Systems SewageGeneral.™ Contact us for more information.
