WELCOME TO THE FLOWPOINT COMMUNITY

THE CITY OF Brush! 1884

BRUSH, CO ACQUIRES BULK WATER STATION

WATER CONSERVATION IS #1

Water conservation was the number one priority for the City of Brush's Water Department. When asked why Brush places such a high value on water conservation, Steven Keimola said, ***"Water is the essence of life, a precious resource that sustains our planet. In our quest for progress let us not forget the simple power of conservation, for every drop saved is a promise to future generations that the well of life will never run dry."*** What powerful words to think about Steven. If you want to ensure that every drop in your utility is counted, contact Flowpoint Environmental Systems to learn about our packaged, turn key bulk water dispensing stations.

CUSTOMER SPOTLIGHT

EPCOR

RIO VERDE FOOTHILLS, AZ ACQUIRES BULK WATER ACCESS TERMINAL

CONTROLLED ACCESS. CLEAR RECORDS.

For its water filling facility serving Rio Verde Foothills, Arizona, EPCOR needed kiosk software to limit access to approved customers. Having used Flowpoint at another standpipe, the team chose it again. Clear purchase records help staff explain transactions and address usage disputes. EPCOR praised the responsive support and described the system as “Very stable, easy to use, customer friendly.”
